I. Introduction
For more than 125 years, Nebraska Methodist Hospital (NMH), an affiliate of Methodist Health System (MHS) has cared for Nebraska’s families. NMH is dedicated to superior service and a deep understanding of patient care, creating better care and better outcomes.

Mission Statement
Committed to improving the health of our communities by the way we care, educate and innovate.

Vision Statement
We will be the preferred integrated health system in the region.

Values in Our Workplace – Cultural Competence
At Nebraska Methodist Hospital, all employees will behave in a way that is consistent with our core values. We intend to hold each other and ourselves mutually accountable for our actions. Demonstrating our values in the workplace means that we will respect a wide range of people both like and unlike ourselves. Our similarities and differences may include these characteristics: race, gender, class, native language, ethnic origin, physical ability, age, religion, sexual orientation, professional experience, personal preferences and work style. We value our diversity. These similarities and differences will be affirmed and respected as we serve all of our customers, our patients, families and coworkers.

Core Values
Patient Centered
We are patient/customer-centered, patient/customer-driven. Our patients are our first priorities. We listen, understand their needs and strive to exceed their expectations.

Respect
We honor and respect the dignity of all. We say what we mean and mean what we say. We require fair, honest and ethical behavior in every activity and under all circumstances.

Excellence
We strive for excellence and push beyond. We strive for the highest standards and push beyond. We continuously improve performance through knowledge, experience, innovation and risk-taking.

Teamwork
We work as one. People are our most important resource. We demonstrate respect and concern for everyone, value each individual as an equal team member and support professional growth and autonomy.

Community Service
We are dedicated to serving our community. We strive to achieve a healthy balance between enhancing the welfare of our community and sustaining our economic growth.
II. Why We Care

From the day the original Nebraska Methodist Hospital was chartered back in 1891, service and commitment to our community has been the top priority. Financial assistance, health education, outreach to under-resourced populations – these and other community benefit activities have always been central to our mission. Our goal has always been to address and improve the overall health of the community.

Our community benefit programs are strategically focused to accomplish the following objectives:

- Improve access to health care services.
- Enhance the health of the community.
- Advance medical or health care knowledge.
- Relieve or reduce the burden of government or other community efforts.

III. 2018 Community Health Needs Assessment Summary

Nebraska Methodist Hospital conducted a needs assessment with numerous community partners including Douglas County Health Department, Pottawattamie County Public Health Department/VNA, Sarpy/Cass County Department of Health and Wellness, Live Well Omaha, Nebraska Medicine and CHI Health.

The assessment was conducted by Professional Research Consultants, Inc. (PRC). PRC is a nationally-recognized health care consulting firm with extensive experience conducting Community Health Needs Assessments such as this in hundreds of communities across the United States since 1994.

Methodology

To ensure the best representation of the population surveyed, a telephone interview methodology — one that incorporates both landline and cell phone interviews — was employed. The primary advantages of telephone interviewing are timeliness, efficiency, and random-selection capabilities.

The sample design used for this effort consisted of a stratified random sample of individuals age 18 and older in the Metro Area. Initially, stratified targets were established for each county or subcounty area: 1,527 surveys in Douglas County (reflecting targets set to achieve 50 surveys per ZIP Code); 100 in Cass County; and 500 in Sarpy County, and 400 in Pottawattamie County. In addition, multiple oversamples were implemented in Douglas County to: 1) increase samples among Black and Hispanic residents; and 2) increase samples to target a minimum of 50 surveys in each ZIP Code in the county. With these oversampling measures, the final sample included 2,527 Metro Area residents.

Once the interviews were completed, these were weighted in proportion to the actual population distribution so as to appropriately represent the Metro Area as a whole.

To solicit input from key informants, those individuals who have a broad interest in the health of the community, an Online Key Informant Survey was also implemented as part of this process. A list of...
recommended participants was provided by the sponsoring organizations; this list included names and contact information for physicians, public health representatives, other health professionals, social service providers, business leaders and a variety of other community leaders. Potential participants were chosen because of their ability to identify primary concerns of the populations with whom they work, as well as of the community overall. Key informants were contacted by email, introducing the purpose of the survey and providing a link to take the survey online; reminder emails were sent as needed to increase participation.

In all, 163 community stakeholders took part in the Online Key Informant Survey.

IV. Identified Opportunities

The following are the areas of opportunity identified through this assessment:

- **Access to Healthcare Services**
- **Cancer**
- **Dementia, Including Alzheimer’s Disease**
- **Diabetes**
- **Heart Disease & Stroke**
- **Injury & Violence**
- **Mental Health**
- **Nutrition, Physical Activity & Weight**
- **Respiratory Diseases**
- **Sexually Transmitted Diseases**
- **Substance Abuse**

V. Implementation Strategy

Findings from Nebraska Methodist Hospital’s Community Health Needs Assessment were initially reviewed by the Board of Directors in December of 2018. Strategies, goals and methods of evaluation were developed to create the FY 2018 – FY 2020 Implementation Strategy For Needs Identified in the Community Health Needs Assessment for both NMH and Methodist Women’s Hospital (MWH), a department of NMH.

This strategy lists some of the local area community partners of which NMH and MWH will collaborate on opportunities that would be consistent with their expertise. As our work progresses, we will identify and partner with new organizations and key individuals as necessary.

This document clearly identifies opportunities where NMH/MWH lacks internal competencies to make a meaningful impact. NMH/MWH will continually monitor these opportunities and collaborate with community organizations that are addressing these needs and as funding and/or expertise are made available, NMH/MWH will respond accordingly.

Strategy Execution and Anticipated Impact

Evaluation of impact will be measured by a subsequent CHNA conducted at the end of this planning horizon. Impact will be compared to current results and influenced by the Healthy People 2020 guidelines and recommendations.

Five top priorities were voted on during a regional health summit, facilitated by Live Well Omaha, and included representatives from 4 regional counties. The results of this community voting process were taken into account and helped guide NMH/MWH’s prioritization process, however, NMH/MWH lacks significant expertise in some of these priorities; NMH/MWH will continue to play a role as a Partner in the Community on these areas.

Opportunities are identified as:

- **Priority I** – NMH has significant expertise to improve these health needs in the community: “Leaders in the Community”
- **Priority II** – NMH has limited expertise to improve these health needs in the community, and will defer to other organizations but collaborate where and when appropriate: “Partners in the Community”
- **Priority III** – NMH has minimal expertise to improve these health needs in the community. NMH does not intend to specifically address these opportunities, NMH will participate with other community organizations currently addressing these opportunities: “Participants in the Community”
Based on all of the above, the Board of Directors of Methodist Hospital has determined that the following needs identified in the CHNA should be addressed through the implementation strategy and approved the 2019 CHNA on December 20, 2018; and approved the 2018 – 2020 Implementation Strategy on April 25, 2019.

Priority I:
- Access to Health Services
- Cancer
- Heart Disease & Stroke

Priority II:
- Mental Health & Substance Abuse
- Nutrition, Physical Activity & Weight Status
- Diabetes
- Injury & Violence
- Sexually Transmitted Diseases

Priority III:
- Dementia, Including Alzheimer’s
- Respiratory Diseases
## Identified as Priority I: “Leaders in the Community”
